The right for every woman to have a 'natural' birth has been recognized for many years, yet surgical interventions continue to rise and, paradoxically, complaints and the degree of litigation for disappointing labor outcomes escalate. Proactive Support of Labor enhances professional skills by providing the expertise for preventing long labors - the root-cause of traumatic birth experiences and the cesarean pandemic. Step-by-step, evidence-based guidance on expert care and support during labor is given. Emphasis is placed on pre-labor education, personal attention, and well-defined birth planning – including strict diagnoses and timely corrective measures in abnormal labor – and constant audit of all procedures and outcomes. Striking a new balance between natural birth and intervention, and invariably enhancing women's satisfaction with the childbirth experience, the fully updated revision of this groundbreaking work will be essential reading for obstetricians, midwives, nurses, and trainees. Challenging Concepts in Obstetrics and Gynaecology is a case-based guide to difficult scenarios faced in both fields, covering many of the major sub-speciality areas of each. The 24 cases have been selected to cover a spectrum of challenges in obstetrics and gynaecology. Recognising that any attempt to cover the whole curriculum is impossible, the authors have instead chosen specific, challenging scenarios that are commonly encountered in clinical practice, but by no means have simple answers or outcomes.

Complex cases are examined from a multidisciplinary approach with consideration of diagnostic procedures, practical skills, evidence base, and the application of national and international guidelines. There is also a summary of evidence from the medical literature in various subspecialty areas of obstetrics and gynaecology, alongside current controversies in management. Cases are punctuated by easy-to-read "Learning Points", "Clinical Tips", and "Evidence Base" boxes, speeding the learning process as well as providing a handy dip-into guide for those just refreshing their memory.
