JoVE TESTS
Get Your Students Prepped Ahead Of Class

JoVE Tests is an easy to use pre-class preparation tool for faculty to assess how well students understand assigned material before lectures and labs.

Teachers can either use pre-generated questions to test comprehension, or create their own questions to highlight specific areas of importance for their curriculum.

- Gain visibility into the students' areas of need
- Get a class-wide view to measure overall comprehension
- The system is built with security in mind — only users verified as faculty can assign tests and see class scores

Students can see their scores after they submit their answers, and enter the class more confident in key concepts and techniques.

To use JoVE Tests:

1. Choose a Science Education video
2. Click "Create a JoVE Test" button (found above the video)
3. Log in to your JoVE.com account
4. Choose questions or create your own
5. Pick an assignment due date and time
6. Send the assignment to your class
7. See results in your JoVE Tests dashboard, or download a .CSV with the data
